DAMANA[®]

Respecting and reproducing the generosity of nature.

Simplicity, authenticity and joy have been at the heart of what DAMANA[®] does best from the very beginning.

Drawing on these core values, DAMANA[®] Earth and Sun was born in 2003. Since then, our collection has expanded to include DAMANA[®] Néroli, DAMANA[®] Organic Bath Line and Apothicals by DAMANA[®].

To these lines are associated richness and authenticity of ingredients of natural and artisanal origin, and the desire to meet the expectations of your guests, in terms of well-being, efficiency and ecology. Our unwavering commitment to our founding values and high standards have led us to develop luxurious products that are as natural and as eco-friendly as possible.

CARE ABOUT EARTH

DAMANA[®] whole-heartedly embraces the Care About Earth program.

The collection is working to reduce its environmental impact by giving natural-origin ingredients a prominent place in its formulas. In the spirit of continuous reinvention, we've selected responsible alternatives to petrochemical-sourced plastic for our packaging.

In a bid to help protect natural resources such as water, DAMANA[®] Earth and Sun now offers a range of solid cosmetic products.

These solids, not only significantly cut back on the water needed for manufacturing, they are 100% plastic-free thanks to the FSC-certified cardboard packaging.

The certified organic bath line DAMANA[®] Organic Bath Line meets the specifications of the COSMOS standard. COSMECERT, a control and certification body, guarantees natural and organic cosmetics.

COSMEBIO is the Professional Association of the Ecological and Organic Cosmetics who brings together all the participants in the network from raw materials and ingredient suppliers to manufacturers and cosmetic laboratories and distributors.

Fundamental principles of the COSMOS standard

1. The use of ingredients from renewable resources and processed by processes eco-friendly.
2. A minimum threshold of natural and organic ingredients to be reached in order to obtain certification.
3. Annual audits on all product manufacturing and packaging sites: our factories have been audited by COSMECERT, which certifies that they have verified their compliance with the specifications for organic cosmetics.

TRAY
